

AMERICAN FLYER... the finest, most realistic trains made!

"When Dad told me I could have something I've wanted just about all my life — a set of electric trains — he said I could have any make I wanted. Well, I didn't have to think that over! I told him American Flyer. "Why?" asked Dad. "Because they look more like real trains than any other," I replied, "and they do almost everything a real train can do, too. Here's what I mean..."

"Those big steam locomotive jobs that American Flyer makes puff real smoke. And while the smoke comes out the stack, you hear the choo-choo sounds right from the boiler, all timed to the driving wheel action!"

"The track that American Flyer makes looks like the real thing. Two rails, flat on top and shaped like the letter 'T'. The difference between a TOY train and a MODEL train is American Flyer 2-rail track, Dad!"

"Well, when I got through telling Dad all that, he just laughed and said 'Son, if American Flyer is that good I guess there's no question about our getting it. And, say, maybe you'll let ME be the engineer once in a while, too!'"

"Pull-Mor Power is what really clinched American Flyer for me. With Pull-Mor, a locomotive can haul 40 or even 50 cars and go up steep grades like a rocket. No other trains have this, Dad, and I think it's important."

AMERICAN FLYER SAFETY FIRST TRANSFORMERS

HOW TO SELECT THE RIGHT TRANSFORMER

A transformer is the heart of your train system. Make sure it's the best—AMERICAN FLYER, with built-in thermostatic circuit breakers.

To estimate the size transformer you'll need, use this rough rule-of-thumb:

THIS EQUIPMENT REQUIRES THIS APPROX. WATTAGE:

Train with small locomotive ——— 25 watts
Train with large locomotive ——— 30 watts
Automatic accessories ——— 25 watts
Coupling accessories, etc. ——— 10-20 watts
Coupling accessories (log loader, coal loader, etc.) ——— 20-40 watts
Each lamp ——— 3 watts

<p>No. 2200 TRANSFORMER, WITH CIRCUIT BREAKER. RATING: 100 WATTS, 115 VOLTS, 60 CYCLES, A.C. Has automatic thermostatic circuit breaker, variable and fixed voltage, 3 binding posts to simplify wiring. \$11.95</p> <p>No. 2205 POWER CONTROLLER, WITH CIRCUIT BREAKER.
