

"GEE DAD . . . JUST LIKE MY AMERICAN FLYER!"

Johnny couldn't be more right. Attention to detail and meticulous craftsmanship are special trademarks with American Flyer. Locomotives are real in everything but size, with actual puffing smoke, Choo-Choo sound effects and precise scale modeling.

2 RAIL TRACK Real-life trains run on 2-rail track . . . and that's what you get with American Flyer. "T" shaped rails (flat on top, for greater traction) look like the real thing. With new Fiber Roadbed (see Track Section) realism is even greater and running sounds quieter.

PULL-MOR POWER

The greatest development ever in model railroading! With PULL-MOR POWER American Flyer locomotives can haul 40 or even more cars, can climb steep grades with ease. No other trains in the world can match PULL-MOR POWER for speed, climb and haul.

Smoke, Choo-Choo and Pull-Mor Power are patented American Flyer features.

"Wait'til The Gang See This Layout, Dad!"

Building an American Flyer model railroad is just about the most fun a boy and his father can have. Step by step you watch it grow—the mainline track linking the cities, the farmlands, the mountains, the tunnels and gorges.

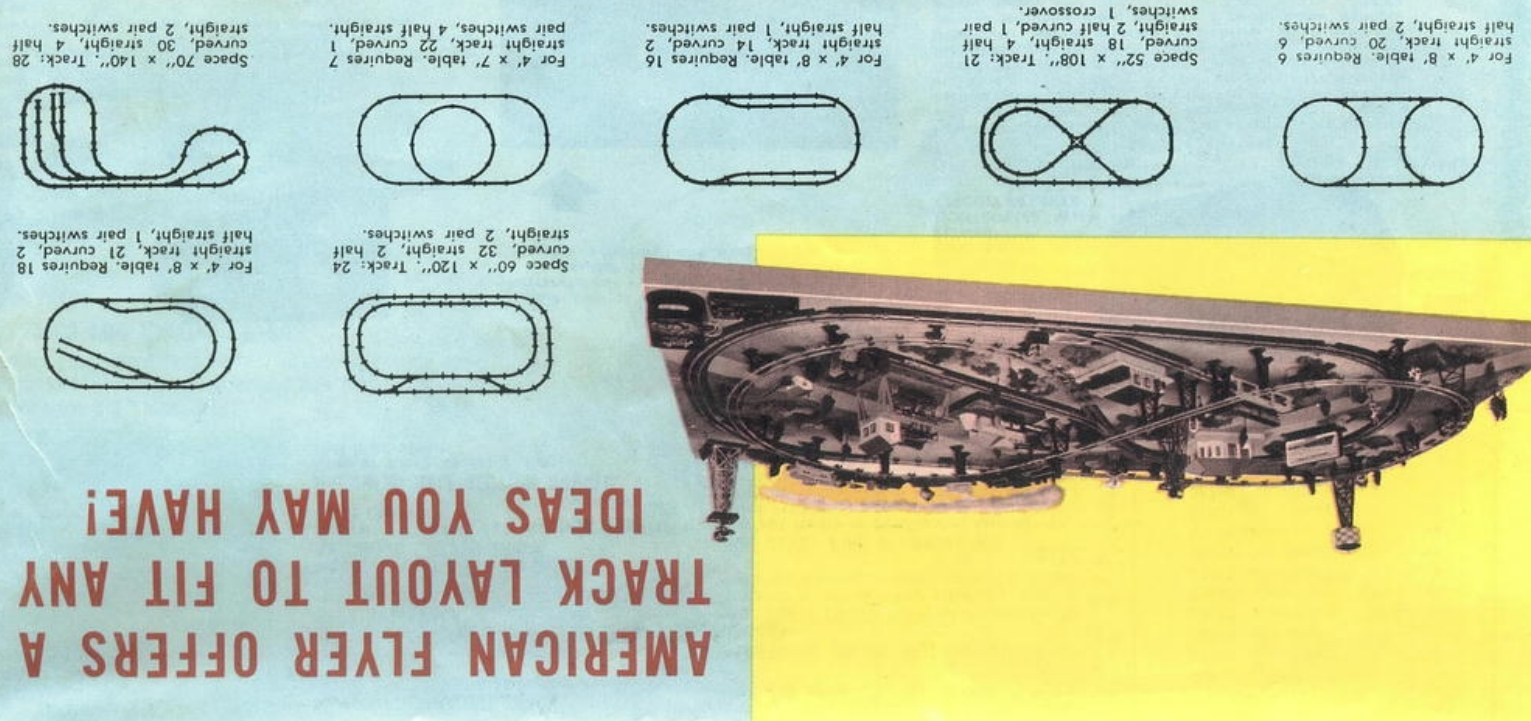

Planning, building and operating — that's the fun of model railroading. Why not start yours today?

LAYOUT SUGGESTIONS FOR AMERICAN FLYER TRACK

- Track required: 21 curved, 18 straight, 4 half-straight, 2 half-straight, 2 pair of switches, 1 crossing.
- Requires 27 straight track, 17 curved, 2 half-straight, 2 pairs of switches.
- Requires 31 straight track, 25 curved, 6 half-straight, 2 pairs of switches.
- Requires 26 straight track, 36 curved, 6 half-straight, 3 pairs of switches.

AMERICAN FLYER OFFERS A TRACK LAYOUT TO FIT ANY IDEAS YOU MAY HAVE!

THIS CERTIFICATE WORTH \$6.98
AMERICAN FLYER
"OVERLAND EXPRESS" CAR CERTIFICATE
Mr. Dealer: Please give to Bearer, FREE OF CHARGE, one No. 24730 American Flyer "Overland Express" Baggage Car when No. 20550 or 23099 "Frontiersman" train set is purchased. REDEEM THIS FROM YOUR DEALER. DO NOT SEND TO A. C. GILBERT COMPANY

HOW TO BUILD YOUR AMERICAN FLYER RAILROAD

Select a 4' x 8' or 5' x 9' sheet of 1/2" plywood on your local hardware store.

Using 1" x 4" pine stock, frame the plywood base to provide rigidity and strength.

After you decide on a track plan, secure the track to the table. American Flyer Roadbed makes the best appearance and also deadens running sound of trains.

Sawhorses are ideal supports. Place one at each end of the layout platform. Sawhorse height should be about 30".

Now you're ready for railroading! Junior can be the engineer, Dad the dispatcher, Mom the station master, Susie the conductor. Fun for the entire family!
